PROFESSIONAL SUMMARY

Graduate Software Engineer with Honours. Background across full stack development with familiarity in VR and hardware integration. Builds practical software solutions by combining technical problem solving skills with a strong focus on user needs.

TECHNICAL SKILLS

Core: JavaScript, TypeScript, React / React Native, Next.js, Python

Familiar: C#, Rust, PHP, HTML/CSS

Tools & Practices: Git, Azure DevOps, CI/CD, Unity, REST APIs, Agile/Scrum, Technical Documentation, AI-assisted development

PROFESSIONAL EXPERIENCE

Software Engineer | Enspyr Pty Ltd

May 2026 – Present

- Contributed to Recycled Sound, a Flutter / Firebase app matching donated hearing aids for recipients.
- Coordinated with tech lead and client to establish ongoing priorities and project context.
- Investigated Android build feasibility for an iOS-primary codebase, identifying platform-specific blockers from native iOS plugins (ARKit, VisionOCR, RealityKit).
- Observed the beta states of the app from TestFlight to flag any UI/UX issues, fix and test them for review.

Software Engineer Intern | Cultural Infusion

Apr 2026 – Present

- Evaluated and integrated open-source SEO/GEO analysis tools for company websites, producing technical documentation for the team.
- Extended an open-source tool with a custom plugin to auto-create Azure DevOps tickets from detected SEO issues.
- Implementing an agentic AI workflow into the tool to automate the process with a human in the loop from site crawling, filtering issues, directly updating the WordPress site and crosschecking to ensure it is fixed.
- Maintained a full change log and developer documentation for all modifications to the open-source codebase.

VR Software Developer (Internship) | Deakin University

Nov 2024 – Jan 2025

- Integrated real-time bike hardware telemetry into Unity VR for the CycleCave system, enabling accurate live feedback.
- Built a data-logging pipeline to export CycleCave telemetry to Excel, delivering client reporting requirements within a day.
- Developed a KAT VR walking system bridging hardware movement to Unity games in real time with developer handover docs.
- Configured a Capture Live multi-camera motion-capture system end-to-end and documented setup for successors.

Project SunCycle Redback (Capstone) | Deakin University

Mar 2024 – Oct 2024

- Promoted to project leader over a 20-member team; managed sprint planning, milestone delivery, and risk assessments.
- Collaborated with senior stakeholders to define strategy and execution plans, measurably reducing task completion time.
- Delivered Unity VR mission features and gamified mechanics, performing testing, debugging, and QA throughout.
- Managed source control via GitHub and produced weekly research documentation on VR mission design.

EDUCATION

Bachelor of Software Engineering (Honours) | Deakin University

Mar 2022 – Oct 2025

Research Thesis: Machine and Deep Learning for Mental Health Classification

PROJECTS

Nav Melb (Multi-Modal Navigation App) | *React Native, Node.js, PTV API*

- Mobile navigation app focusing on waypoint chaining to manually connect public transport with driving in order to predict when reaching station without choosing either just driving or public transport.

Writer's Blog | *Jekyll, GitHub Pages, HTML/CSS*

- Deploy static website for creative hobbies like story writing.

Bank Transaction Tracker | *Next.js, PDF parsing, data visualisation*

- Upload a bank statement PDF and get a visual breakdown on monthly spending, also based on category.

Browser Tab Accountability Extension | *JavaScript, Tauri, Rust*

- Desktop app tracking time spent in browser tabs and applications, surfacing usage patterns to the user.

Kangaroo Tuning Proof of Concept | *Python, audio signal processing*

- Prototype exploring frequency-based audio signals to redirect kangaroos away from high-risk road corridors.

VOLUNTEERING & COMMUNITY

Food Packaging Volunteer | *Empower*

May 2025 – Present

- Sorted and packed 100+ food packages per session and restocked inventory in a 10-person team.
- Acted as personal shopper for clients, balancing individual needs against available stock.

Committee Member | *Deakin Volunteering Hub*

Mar 2025 – Oct 2025

- Drafted event and volunteering opportunity listings for the DVH newsletter.
- Coordinated volunteers across Edgar's Mission, Bento's Box, and other campus community events.
